Nutrition plan

Growth stage ^[a]	Pre drilling	Transplanting	4–6 leaf stage	Main vegetative stage	Head development ^[b]	Total nutrients# (kg/ha)
SoilWorx option 1	K-Boost 1000 kg/ha	N-Boost 1000 kg/ha		Final top up of N & S as required for expected yield and market	Foliar nutrients + biostimulants	N 110 P ₂ O ₅ 40 K ₂ O 190
SoilWorx option 2 for high 'P' & 'K' index sites	Dynamo 750 kg/ha		N 110 P ₂ O ₅ 35 K ₂ O 42			

NB. ^[a]This leaves short of phosphorus by approx 30–50 kg depending on which product is used and the soil indices. ^[b]Based on leaf tissue or sap analysis.

Total nutrients delivered by SoilWorx and optional nutrition. Additional nutrients may be required from alternative sources.

Always speak to a qualified FACTS advisor for crop requirements.

This example crop nutrition plan is for illustrative purposes and only sets a rough guide to users. Users should consult their local agronomist to assess suitability for crop and soil whilst using SoilWorx products. Users should always check the product datasheet and associated SDS before using and accept risk & liability in connection to using SoilWorx products.
