

# potato

## Nutrition plan

Growth stage	Pre planting <sup>[a]</sup>	Planting	Vegetative growth	Tuber initiation	Tuber bulking <sup>[b]</sup>	Maturity	Total nutrients# (kg/ha)
<b>SoilWorx option 1</b>	K-Boost 2000 kg/ha	DAP or Liquid alternative to supply balance of 'P' required		Final application of nitrogen required adjusted for end market	Foliar phosphate and biostimulants		N 60 P <sub>2</sub> O <sub>5</sub> 40 K <sub>2</sub> O 340
<b>SoilWorx option 2</b>	Dynamo 2000 kg/ha						N 80 P <sub>2</sub> O <sub>5</sub> 40 K <sub>2</sub> O 60

NB. <sup>[a]</sup>This leaves short of phosphorus by approx 75–90 kg depending on which product is used and the soil indices, could use DAP or liquid equivalent at planting. <sup>[b]</sup>Depending on leaf tissue or sap analysis.

# Total nutrients delivered by SoilWorx and optional nutrition. Additional nutrients may be required from alternative sources. Always speak to a qualified FACTS advisor for crop requirements.

This example crop nutrition plan is for illustrative purposes and only sets a rough guide to users. Users should consult their local agronomist to assess suitability for crop and soil whilst using SoilWorx products. Users should always check the product datasheet and associated SDS before using and accept risk & liability in connection to using SoilWorx products.
